How to print your labels in nonstandard size with snapshot function for Windows and MAC

*If the printed PDF/file is not standard size, (standard size: 4*6, 4*7, 4*3, 4*2, 3*2), it will cause you print over labels, so*
you have to use the function of "take a snapshot" to print in case that it prints over label or prints blanks. Here are thesteps to operate.

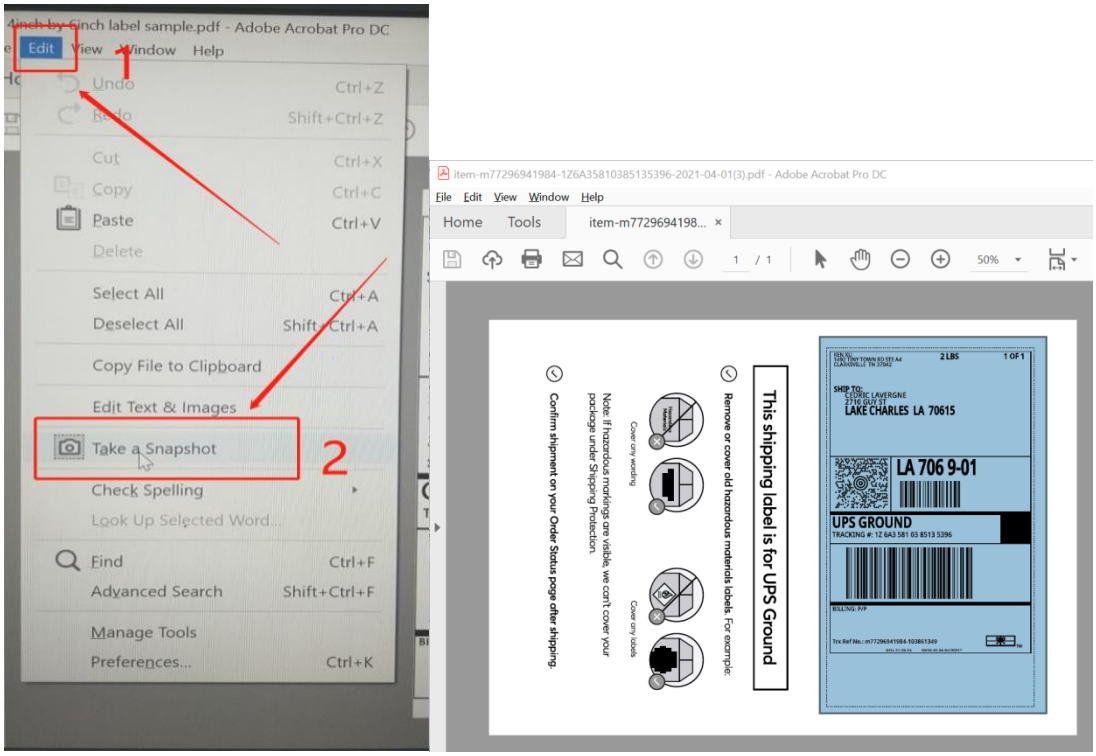
(1).For windows:

a.

Open the PDF in Adobe Reader

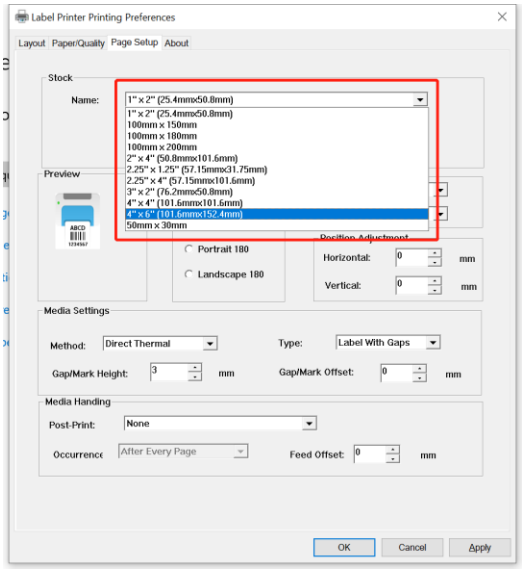
b.

From the top panel, select "Edit">"Take a Snapshot", choose the area you want to print.



c. Then click "Print", set up the page size that matched to the load label size. Then print.

Note： Please make sure the page size match to the load label size, otherwise, it is possible that it prints out over label or misaligned.

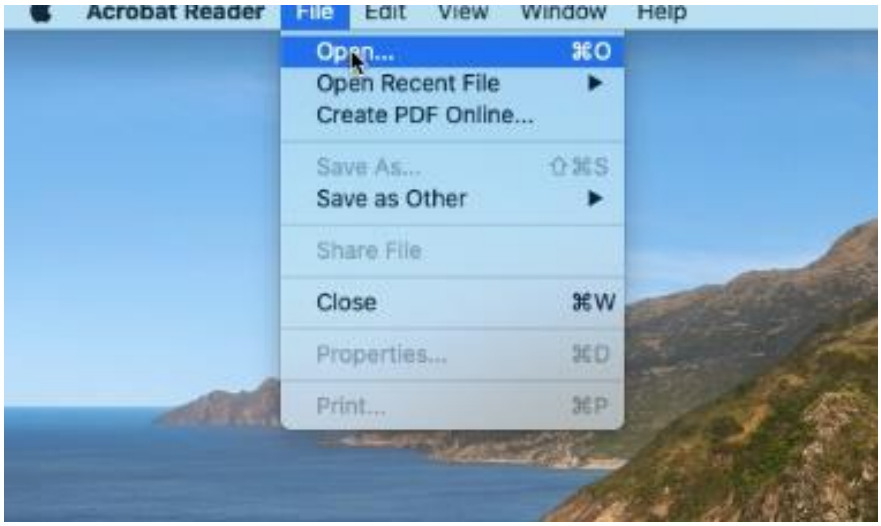


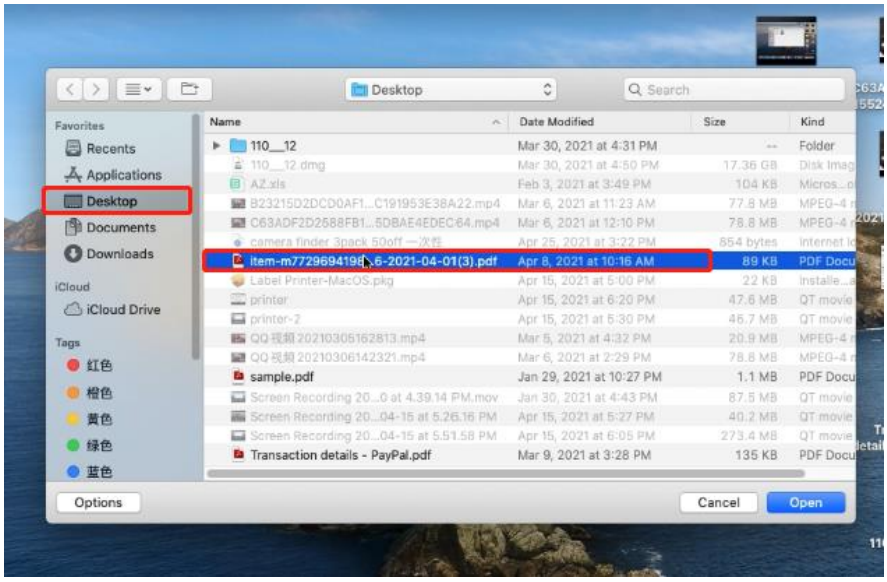
(2)For MAC

Similarly, Mac also has analogous steps.

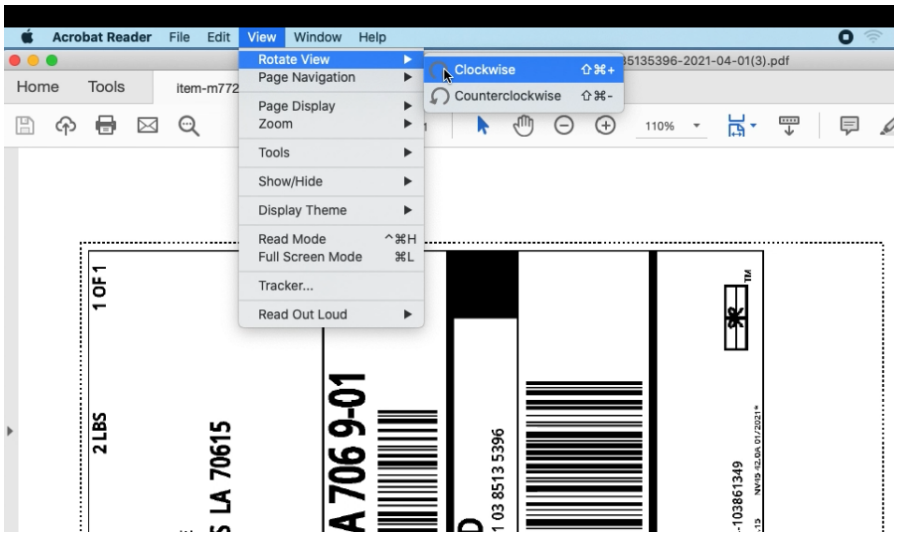
a. Find the “File” in the top left corner of you desktop ＞ Click “Open”＞ Click Desktop ＞ Choose PDF file

（or you can open the file with Adobe）





b.From the top panel, select View ＞Rotate View＞Clockwise so that the labels are side by side.



C. Next, from the top panel, select Edit＞Take a Snapshot. Then click and drag over one of the labels that you need. So that you can print a specific range of label.
